   Feedback wanted!

SLA Deliverables Completed

3rd Month (Reporting period March 1-31, 2007)

✓ Documented functions performed for IETF

4th Month (Reporting period April 1-28, 2007)

5th Month (Reporting period May 1-31, 2007)

6th Month (Reporting period June 1-30, 2007)

✓ IESG transparency into requests

✓ 90%+ of requests processed within goals

✓ Identified areas for improvement and modified processes

All deliverables were reported either in a monthly report or a separate report to the IETF-IANA Committee.

Current Issues

- Continue SLA implementation
- Statistics collection and presentation
- Continue XML project for IANA registries
- Examine possible integration tools
- Continue review of IANA Matrix
- Port Number processes review
- Continued improvements in processing times

Next Meeting Goals

Complete deliverables for next 5 months (Reporting periods July 1 - November 30, 2007)

Includes:

- ➢ Work to integrate IANA's ticketing system with IETF and RFC-Editor tracking systems
- ➢ Inventory all RFCs to make sure IANA actions were performed (extended from 6th month deliverable)
- ➢ Review existing SLA and begin discussions on future version

Statistics

- Working with the IETF-IANA Committee to determine which statistics are most meaningful (also visual representation of charts)
- Statistics are now more accurate (older tickets with inaccurate data have been resolved)
- Still have issues with how IANA's ticketing system handles some ticket transactions (queue changes and merging tickets)
- Development of new database to extract statistics for reports and charts is being discussed
- The statistics show that IANA is performing well!
